Mykyta Fedko

Frontend-Developer

I slipped into the IT industry through good performance in the IT subjects. I am always looking for new challenges.

Education

Lviv National Polytechnic University
2017-2021
Bachelor degree, Electrical Engineering

Experience

Frontend Developer with 1 year experience
implementing complex web apps,
specializing in SPA development utilizing
React library, creating simple games using
JavaScript functions to implement logic.
Styling complex apps and SAP with BEM
Methodology using SASS/SCSS.

At last project of learning course Apiko Academy
Front-end React JS Web Development,
I developed SPA using React Router Dom Library
for making another pages with routing.
Creating modals for authorization with validation
using Yup and formik libraries and getting user
data with JWT Authorization token.
Used axios library for work with API requests of
putting product to favorite getting list
of product or favorite products, categories etc.
Implemented Redux store to cart and favorite
pages with silcer storing user data and Redux
Persist to save state after refreshing.
And at last using Toastify library for notification
user about his action and its status.
